PROJECT

AI-Based Mental Health Support Chatbot

April 2025

Python, NPL, Machine Learning, Chatbot Framework

- Designed and developed an AI-powered chatbot for mental health support to provide emotional assistance and basic guidance to users.
- Implemented Natural Language Processing (NLP) to understand user inputs and respond empathetically.
- The chatbot helps users with stress, anxiety, and emotional well-being through conversational interaction.
- Focused on user privacy, ethical AI usage, and non-judgmental responses.
- Improved user engagement by designing context-aware and supportive conversation flows.
